#### **DETAILED ACTION**

# Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-3, 5-7, 8, 10, 11, 13, 14, 20-22 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 3,597,909 to Lauridsen, Sr.

The Lauridsen '909 patent discloses a wheeled (21, 22) handling system for vegetables with a root portion and a leafy portion. The handling system comprises a pair of counter-rotating rollers (50) with at least one roller having a spiral (52) adapted to move the vegetable along the pair of rollers. The other roller has a spiral also, and the spirals cooperate to pull the leafy portion down between the rollers while the root portion remains above the roller. See Fig. 4, and col. 4, lines 3-9.

Regarding claims 2-3: A cutting mechanism (T) comprising a cutting blade (61) severs the leafy portion from the vegetable. The rollers and the blade are generally horizontal so that the pair of rollers ejects the vegetable past the blade.

Regarding claims 5-7: The spirals are disclosed as being constructed of V-belting (col. 4, line 8). V-belting of this type typically is constructed of reinforced rubber; therefore, the spirals (and members) have both a rigidity and a flexibility.

Regarding claim 8: The system comprises a diving mechanism (54).

Application/Control Number: 10/815,470 Page 3

Art Unit: 3671

Regarding claims 20-21: The method, as claimed, would be inherent as the normal and logical manner in which the system of the Lauridsen '909 patent would be used.

# Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 4, 17-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 3,597,909 to Lauridsen, Sr., in view of U.S. Patent No. 5,431,231 to Abe et al., cited by Applicant.

The Lauridsen '909 patent discloses the claimed invention, as stated in paragraph 2 above, except for the cutting mechanism comprising rotating cutting blades and grabbing disks. The Abe '231 patent teaches that it is known in the art to provide a vegetable topper with a cutting mechanism comprised of grabbing disks (25) and rotating cutting blades (26). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the system of the Lauridsen '909 patent with the cutting mechanism of the Abe '231 patent in order to provide an alternative means for cutting tops of vegetables.

## Allowable Subject Matter

5. Claims 9, 12, 15, 16, 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nathan Mammen whose telephone number is (703) 306-5959. The examiner can normally be reached Monday through Thursday from 6:30 a.m. to 5:00 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas B. Will, can be reached at (703) 308-3870. The fax number for this Group is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-1113.
